EBITDA adjusted for acquisition and other non-recurring costs ('adjusted EBITDA') grew by 38% to \$28.0 million, with the following Note 1 in the Financial Statements setting out the reconciliation to profit before income tax from continuing operations.

Directors' Report (continued)

Review of operations (continued)

CTM continues to maintain a strong financial position, with net current assets of \$34.5 million and total equity of \$250.0 million. At 31 December 2015, the Group had nil interest bearing debt and has continued to generate strong operating cash flows.

The business' growth has been funded by a combination of operating cash flow and short term debt funding.

The Company continues to pay dividends in line with its stated divided policy level, with an interim dividend declared at 9 cents per share (2015 financial year end dividend: 10.0 cents per share). This dividend represents an interim payout ratio of 51%.

Review of underlying operations

Australia and New Zealand ("ANZ")

TTV (unaudited) rose by 3% to \$417.4 million. TTV was impacted by soft trading activity of the existing client base. However, due to the continued market share growth and client retention, the region still managed to grow.

Revenue, as a percentage of TTV, has fallen from 9.1% to 8.9%, which reflects the mix of client size in the business, with larger accounts being lower yielding. However, adjusted EBITDA contribution has improved to 34.3%. Continued productivity gains have also positively impacted this result.

The increased turnover has flowed through to the adjusted EBITDA, with an improved margin of 34.3%, an increase from 30.8% on the prior comparative period. Continued productivity resulting in economies of scale were the major components of this improvement.

North America

TTV (unaudited) rose by 20% to \$327.9 million as a result of new business acquisitions and the impact of three business acquisitions made in the previous financial year. The year was also a period of integration and consolidation, in order to develop the framework for the North American business to achieve further scalable growth in the future.

The improved top line margin percentage is due to further scale synergies provided by the larger business which is not yet flowing to EBITDA contribution. CTM North America is now poised for future growth.

Asia

The TTV (unaudited) in Asia rose by 87% to \$814.3 million. The performance of the wholesale business was instrumental in this growth. Due to the top line growth in the lower yielding wholesale business, the income margin dropped from 5.9% to 4.2%, however, the adjusted EBTIDA margin improved from 25.2% to 31.3%. This improvement reflects the scalability of wholesale revenue over its cost base and the improved performance in the corporate and leisure businesses, resulting from market share growth.

Europe

The European operation performed well during the period with continued regional market share gains. The EBITDA contribution for the period was \$2.7 million at a margin of 15%, which is in line with the previous six months. The directors expect that the European operation to have a larger contribution to Group profits in the second half.

Events since the end of the financial year

Other than the following items, there have been no other matters, or circumstances, not otherwise dealt with in this report, that will significantly affect the operations of the Group, the results of those operations of the state or affairs of the Group or subsequent financial years.

Directors' Report (continued)

Events since the end of the financial year (continued)

As part of this transaction, an initial consideration of \$46,975,089 (US\$ 34,320,000) was paid through a mixture of cash and Corporate Travel Management Limited shares. This cash consideration was funded through USD denominated debt.

A further contingent consideration payment of up to \$35,833,561 (US \$26,180,000) may also be payable on 31 March 2017, based on Montrose achieving annual EBITDA targets and other business development targets.

Due to the timing of the acquisition, CTM has not yet finalised the provisional calculation of the net identifiable assets or purchased goodwill. The financial effects of the transaction have not been brought to account at 31 December 2015.

Auditor's Independence Declaration

A copy of the auditor's independence declaration as required under section 307C of the Corporations Act 2001 is appended to this Directors' Report.

3. Income tax expense

Income tax expense is recognised based on management's estimate of the effective income tax rate expected for the six months ending 31 December 2015. The estimated tax rate used for the six months ended 31 December 2015 is 23%, compared to 28% for the six months to 31 December 2014. The lower tax rate in the current year is principally driven by the broad mix of jurisdictions in which the Group now undertakes activities, including entities located within various European and Asian jurisdictions with comparably low corporate tax rates.

5. Fair value measurement

The Group measures and recognises the following assets and liabilities at fair value on a recurring basis:

Contingent consideration.

Fair value hierarchy

AASB 13 requires disclosure of fair value measurements by level according to the following hierarchy:

- a) Quoted prices (unadjusted) in active markets for identical assets or liabilities (level 1);
- b) Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly or indirectly (level 2); and
- c) Inputs for the asset or liability that are not based on observable market data (unobservable inputs) (level 3).

The following information represents the Group's assets and liabilities measured and recognised at fair value at 31 December 2015:

Liabilities: Level 3 – Contingent Consideration \$29,916,881 (30 June 2015: \$38,436,486).

Fair value measurements using significant unobservable inputs (level 3)

The following table presents the changes in level 3 instruments for the year ended 31 December 2015:

	Contingent Consideration \$'000
Opening balance 1 July 2015	38,437
Additions	-
Paid out (cash and shares)	(6,035)
Release to income statement	(2,503)
Foreign exchange movement	(307)
Discount unwind	325
Closing balance 31 December 2015	29,917

There were no changes made to any of the valuation techniques applied as of 30 June 2015.

Valuation inputs and relationships to fair value quantitative information about the significant unobservable inputs used in level 3 fair value measurements is summarised as follows:

Description: Fair Value at 31 December 2015: Valuation technique used: Unobservable inputs: Discount rate: Contingent consideration \$29,916,881 Discounted cash flows Forecast EBITDA 3.10%

The main level 3 inputs used by the Group in measuring the fair value of financial instruments are derived and evaluated as follows:

- Discount rates: these discount values are determined using a model to calculate a rate that reflects current market assessments of the time value of money and the risk specific to the asset.
 An increase/ (decrease) in the discount rate by 100 bps would (decrease)/ increase the fair value by (\$416,900)/ \$404,578.
- Forecast EBITDA for the period 1 January to 30 June 2016, the entity's knowledge of the business and how the current economic environment is likely to impact it.
 If forecast EBITDA were 5% higher or lower, the fair value would increase/decrease by \$101,392/ (\$117,694).

5. Fair value measurement (continued)

Fair values of other financial instruments

The Group also has a number of financial instruments which are not measured at fair value in the Statement of Financial Position. For these instruments, their carrying value was considered to be a reasonable approximation of their fair value.

Due to their short-term nature, the carrying amounts of the current receivables, current payables and current borrowings are assumed to approximate their fair value.

Valuation processes

The finance department of the Group performs the valuations of assets required for financial reporting purposes, including level 3 fair values. This team reports directly to the Chief Financial Officer (CFO) and the Audit Committee (AC). Discussions of valuation processes and results are held amongst the CFO, AC, and the finance team at least once every six months, in line with the Group's reporting dates.
